Scale Agile Framework

Timeline estimation: Agile Mode

Vision.

- The vision describes a future view of the solution to be developed, reflecting customer and stakeholder needs, as well as the features and capabilities that are proposed to address those needs.

Roadmap.

- The roadmap communicates planned deliverables and milestones over a timeline.

Milestones.

- A milestone is used to track progress toward a specific goal or event. Our framework describes fixed-date, Program Increment (PI).

Sustainability

pep+™
pepsicopositive
planet + people

We're changing how we source our ingredients make and sell our products, and how we inspire people through our brands.

By 2030, we plan to reduce our greenhouse gas emissions (Scopes 1 and 2 by 75% and Scope 3 by 40%) against a 2015 baseline, doubling our previous climate goal.

Scope 1 emissions refer to direct GHG emissions from sources that are owned or controlled by the company. This includes on-site fossil fuel combustion and fleet fuel consumption.

Epic	Feature	User Story
Scope 1 Data into Data Warehouse	Automation of Data Business Travel for all Continents	Data Source Exploration for NorthAmerica Business Travel

The Real Life

Is User Story taking ages to complete?

Are team members not aligned on the different tasks?

Business not seeing progress?

Breakdown User Stories

Additional sessions to clarify doubts and resolve bottlenecks.

Promote participation of every team members.

Communicate the current status and manage expectations.
